REGISTRATION FORM

For this new gathering SIMCA, Club Simca France has chosen to welcome you on a site classified as historical monuments, both the castle and the park.

The castle of Castries is a 17th century building built on medieval bases and dominates the town of Castries, near Montpellier in Hérault on south of France . It has two square houses (a third would have had to finish the U around the courtyard but was not built). These dwellings are confined to three square pavilions covered with recently broken roofs, covered with glazed tiles. Currently in full restoration, the castle is not open to visit. (Except for us !)

The Orangerie, the courtyard terraces, the paths leading from the central basin were designed by the chief gardener of the Versailles gardens André Lenôtre, and the grounds of topiaries were replaced by fountains and doors of lfs in 1930.

To bring water from the Fontgrand source to the Castries castle gardens, an aqueduct was built in1670 by Pierre Paul Riquet, the architect of "Canal du Midi". This aqueduc is 6800 meters long for only 3 meters difference of level.

We will access in the castle park by a specific entry and we will group our dear cars by models. A privileged place will be granted to the Simca 1100, which will be the 50 years of existence of the first models.

You will also find the traditional "Village Simca", its shop, its coin exchange including a personal fellowship on all Saturday day, its podium animation, including a presentation of the participants' vehicles on Saturday afternoon.

Hot meals will be served only at lunchtime on Thursdays, Fridays, Saturdays and Sundays in the courtyard of the castle in addition to a refreshment bar and a small snack area.

For planning and organizing purposes, pre-meal registration is mandatory. It is the same for the visits and animations that we have prepared to you to enhance your stay.
